

Sprint-1

Python Script

Date	13-11-2022
Team ID	PMT2022TMID02471
Project Name	IOT BASED CROP PROTECTION SYSTEM FOR AGRICULTURE

Description:

The random sensor data's are generated and automation has been implemented through the python code instead of using hardware to implement IOT based crop protection system. And the python code need to upload the data's in IBM cloud are written in this python script.

Python Code:

```
import random

import ibmiotf.application

import ibmiotf.device

from time import sleep

import sys
